

Bhatt Nishchay Shivkumar
Frontend Engineer | React and React Native | Performance Engineering

Bengaluru | nishchay.bhat@gmail.com | github.com/Nishchay1571999 | linkedin.com/in/nishchay-bhatt/

PROFESSIONAL SUMMARY

Frontend engineer with 4+ years of experience building and optimizing production React and React Native products. Reduced JavaScript bundle size by 35%, app size by 42%, and improved the crash-free rate to 99.3%. Currently owns major parts of HiRobin's AI dialer, including mobile architecture, Android native modules, call forwarding, payments, real-time chat, and VoIP. Previously shipped products serving 150K+ daily active users and payment infrastructure processing 900K transactions per month.

TECHNICAL SKILLS

Frontend and Mobile: React, React Native, TypeScript, JavaScript, Next.js, Zustand, TanStack Query, Android native modules, Material UI

Backend and Data: NestJS, Go, GraphQL, Kafka, PostgreSQL, Redis, ClickHouse, BullMQ, SQL

Engineering: Performance optimization, WebSockets, event-driven architecture, payments, VoIP systems, Jest, Flipper, Docker Compose

PROFESSIONAL EXPERIENCE

SDE 2 | HiRobin (Taskgeine Pvt Ltd)

Jan 2026 - Present

- Built the React Native application end to end for an AI calling assistant, owning core mobile architecture, feature delivery, and production quality.
- Developed native Android modules for dialer capabilities and connected platform telephony features to the React Native application.
- Implemented the complete call-forwarding setup that routes incoming calls into HiRobin's AI-assisted calling workflows.
- Built subscription and payment flows with supporting backend services, created the in-app chat interface, and maintained and expanded WebSocket integrations for chat and VoIP workflows.
- Improved client performance and responsiveness across core flows, and drove product ideation for call segmentation and analysis.
- Designed backend foundations for payment processing and VoIP calling, translating product requirements into service boundaries and implementation plans.

SDE 2 | Buzzworthy

Sep 2025 - Jan 2026

- Built frontend and backend workflows for a financial product that simplified loan applications and status tracking.
- Developed beehive tracking, production, and maintenance modules and maintained a custom questionnaire agent for product and service discovery.
- Maintained IBL Bank's volunteering portal, resolving bugs, scaling issues, and feature requests.

SDE 1 | Jumbo Gaming

Dec 2024 - Sep 2025

- Built and scaled real-time Ludo and Plinko experiences in React Native for 150K+ daily active users, with smooth multiplayer performance.
- Built an in-house payment service that processed 900K payments per month.
- Implemented and optimized CleverTap push notifications, contributing to a 28% increase in user retention.
- Led development of an in-house fantasy product using Next.js, GraphQL, and NestJS; built complex internal product analytics interfaces backed by ClickHouse and A/B testing workflows using PostHog.

Software Engineer 1 | Royal Brothers

Sep 2022 - Dec 2024

- Built and owned the complete internal field-operations app in React Native, including phone-number authentication, bike blocking, vehicle exchange, local image storage, and subscription-based exchange workflows.
- Developed companion operations interfaces in React and Material UI, increasing operations efficiency by 67%.
- Reduced JavaScript bundle size by 35% and app size by 42%, while improving the crash-free rate to 99.3% through caching and runtime optimization.
- Led delivery and testing of the operations app and used Flipper, Jest, and react-test-renderer for performance analysis and unit testing.

React Native Android Developer Intern | Value Floatr Pvt Ltd

Jun 2022 - Aug 2022

- Contributed to React Native Android application development in a production engineering team.

SELECTED PROJECTS

Offline-First Field Operations Console | In Progress: Building a React and TypeScript operations interface with Leaflet geospatial overlays, Zustand workflow state, TanStack Query server state, Recharts dashboards, IndexedDB-backed offline writes, REST and WebSocket updates, reconnect synchronization, and performance testing for low-bandwidth environments.

rn-bootloader: Open-source React Native library that improves perceived startup time by preventing initialization work from blocking the first UI render.

EDUCATION AND CERTIFICATION

Srinivas Institute of Technology: Bachelor of Technology studies

Certification: HackerRank Intermediate JavaScript Developer
